### The Benefits of Texting with MedLinkMD

Collecting past-due accounts receivables from your patients can sometimes be a difficult operation. MedLinkMD has been created to help medical organizations collect those non-paying accounts. We specialize in medical revenue recovery and have streamlined the process by developing a mass text messaging workflow process supported by new and efficient procedures and programs to boost A/R efficiency and improve your cash flow.

#### Fast & Effective

Text messaging your past-due patients has been proven more effective than calls, emails or even mailing letters

#### Fully Secured

With MedLinkMD, texts will be HIPAA compliant and secure with latest security features

#### Get Paid Faster

Patients will be directly sent to your own payment methods and systems cutting out 3rd party expenses (we do not collect anything)

### How it Works

#### 1. Send Us Your List

Simply upload to us a CSV file that contains our required information

#### 2. We Text Your Patients

MedLinkMD sends out mass texts to your past-due patients up to 2 times per months based on your instructions

#### 3. You Collect Payments

Our text messages direct patients to pay on your payment portals or office number to pay directly - so money goes straight to you!

#### 4. Review Your Lists

Each month we send updated lists to see activity – if patients are responding and if payments are made.
